

# Thank you!

We are grateful to the following donors for their support of the SWOT Program in 2023–2024: Betlach Family Foundation, Marisa I. Hormel Trust, Moore Family Foundation, Seiko, Joseph and Diane Steinberg, Mark Swingle, and Upwell Coffee, as well as the Association of Zoos & Aquariums' Sea Turtle SAFE (Saving Animals From Extinction) Program and its partners, including: Adventure Aquarium, Aquarium of the Pacific, Audubon Nature Institute, Florida Aquarium, Gladys Porter Zoo, Mystic Aquarium, National Aquarium, New England Aquarium, North Carolina Aquarium on Roanoke Island, OdySea Aquarium, Remote Ecologist Inc., SEA LIFE Arizona Aquarium, South Carolina Aquarium, Texas State Aquarium, The Aquarium at Moody Gardens, The Maritime Aquarium at Norwalk, Topeka Zoo & Conservation Center, and Virginia Aquarium & Marine Science Center.

We are particularly indebted to and wish to recognize **Gordon Moore (1929–2023)** and his beloved wife of 72 years, **Betty Moore (1928–2023)**, for their decades of support to SWOT. As the founder of Intel, a semiconductor pioneer, and the author of Moore's Law, Gordon gave us the technology that shapes our everyday lives. Betty is remembered as an advocate for patients and families, a champion of nursing, and a pioneer for improving health care. She was responsible for founding a school to transform health care, and together she and Gordon built the Gordon and Betty Moore Foundation to seek durable change in environmental conservation, scientific research, and higher education. Their generosity will shape the world for generations to come.

Gordon and Betty, along with their sons, Ken and Steve, and daughters-in-law, Kris and Kathleen, were believers in SWOT since its inception in 2003. One family member shared with SWOT's cofounders that "Gordon stated on several occasions . . . that SWOT had accomplished the kind of thing he and Betty set out to do back in 1986—make an important difference that could be measured. Gordon thought SWOT was a perfect example of how our family could make an impact because of the grantee's scientific, thorough, and consistent approach; SWOT's filling of the gaps in knowledge of sea turtles, especially as indicator species for the state of our oceans, gave him great satisfaction." Those who knew Gordon and Betty will be forever inspired by their wisdom, humility, and generosity.
